Land Line 01406 422903

Mobile 07939 724080

The Winchester taxi was built in very small numbers and the basic assembly of body and running chassis were finished by hand.

The list below identifies the vehicles from which the major components for each Series were taken.

Many of the minor components were bought from the local motor factors as and when needed, so there was very little consistency in the parts used beyond the driveline and brakes

A workshop manual for the Perkins 4.99, 4.107 and 4.108 diesel engines is available from the LVTA Shop
